**Wireless Internet Access Policy**

The following rules and regulations of the CVW Long Lake Public Library. These are affective July 20th, 2021 as adopted by the Board of Trustees of the CVW Long Lake Public Library.

The CVW Long Lake Library free wireless Internet access to library users with wireless – enabled devices. The library provides unrestricted access to the Internet and does not monitor all control content. The provisions set forth in the Library's Internet Use Policy are applicable to wireless network access.

Our network supports a wide range of laptop computers. Most wireless network cards will be compatible. However, the Library can make no guarantees as to compatibility of a library user's device with the library network. If a device doesn't recognize our wireless network, the library user should review the configuration settings provided at the circulation desk. Library staff does not provide wireless access support and will not install or modify hardware or software.

Communication through the wireless network should not be considered secure. Library users are responsible for selecting and installing security protection and current virus definitions on their wireless devices. The Library is not responsible for damage to hardware or software, transmission of computer viruses, or email, or any harm resulting from the use of an unsecured server. It is strongly advised that personnel, financial, or otherwise sensitive information not be transmitted through the wireless network.

Printing from the wireless network is available. Files should, also, be saved to the device and emailed to the user to ensure a backup copy of the original document.

The wireless network can accommodate interactive searches on the web. It cannot accommodate the downloading of large document files. Therefore, downloading of software, images, music, etc. from the web onto a library user's equipment is not permitted. Library users will be asked to terminate any activity that adversely impacts the network's performance.

When using wireless- enabled devices to listen to music, dialogue, sound effects, etc. Library users must use earphones to make the sound inaudible to others. If sound is heard, despite the use of earphones, the library user most lower the sound level or turn the equipment off.
